Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	<u>1-22</u>	YES
	Claims		NO
Inventive step (IS)	Claims	<u>1-22</u>	YES
	Claims		NO
Industrial applicability (IA)	Claims	<u>1-22</u>	YES
	Claims		NO
2. Citations and explanations (Rule 70.7)			
<p>1. Document D1 is considered the prior art closest to the subject matter of claim 1 and discloses (the references between parentheses refer to that document) the same method for producing plastics mouldings (MTB) with functional surfaces as in claim 1 (claims 1, 8-13; page 1, lines 12-15; page 2, lines 15-22; page 7, line 13 - page 8, line 39; page 11, lines 20-34).</p> <p>2. The subject matter of claim 1 thus differs from that known from D1 in that in the present application the coating part B is covered with a protective film that has special properties and the side of the protective film facing the coating B has a specific level of hardness and a specific degree of roughness.</p> <p>The subject matter of claim 1 is thus novel (PCT Article 33(2)).</p> <p>3. The differences between claim 1 and D1 have the effect of improving the course, the distinctiveness of the reflected image and the</p>

	<p>lustre of the surface of the plastics moulding (see page 6, lines 11-18). The present invention can thus be considered to address the problem of developing a plastics moulding with the above-mentioned, improved properties.</p> <p>4. The choice of a protective layer with the characterising parameters of memory submodule, elongation at break and UV transmission cannot be considered an obvious way for a person skilled in the art to solve the aforementioned problem. The solution to that problem as proposed in claim 1 of the present application therefore involves an inventive step (PCT Article 33(3)).</p> <p>5. Based on a similar argument, the subject matter of independent claim 22 is novel and involves an inventive step (PCT Article 33(3)).</p> <p>6. Claims 2-21 are dependent on claim 1 and therefore likewise meet the PCT requirements for novelty and inventive step.</p>
